

### **INTERVIEW SUMMARY**

On Wednesday, August 18, 2010, a telephone interview occurred between Examiner Ebenezar Sackey of the U.S. Patent and Trademark Office and the below signed representative, Mrs. Valerie Neymeyer-Tynkov. The interview was initiated by Examiner Sackey. The below comments are according to Mrs. Neymeyer-Tynkov's recollection. In the event that the Examiner's recollection does not agree with the below, the Examiner is invited to contact Mrs. Neymeyer-Tynkov to discuss further.

During the interview, Examiner Sackey advised that pending claims 15 and 33 are directed to too many possible diseases and are unpatentable as written. The Examiner further indicated that he has discussed these claims with his Supervisor, who is in agreement with this position. The Examiner suggested canceling claims 15 and 33 to further prosecution of this application.

Mrs. Neymeyer-Tynkov noted that pending claims 34 and 35 are directed to Alzheimer's disease and schizophrenia and inquired whether, if claims 15 and 33 are canceled, claims 34 and 35 would be suitable for further examination by the Examiner. Examiner Sackey indicated that claims 34 and 35 appeared to be suitable for further examination.

Applicant and Mrs. Neymeyer-Tynkov thank the Examiner for his comments, time and effort in this application.
